## 5<sup>th</sup> International Clinical Engineering & Health Technology Management Congress (ICEHTMC) November 10-13, 2023, Visakhapatnam, India

Dear 5<sup>th</sup> ICEHTMC Congress Community,

On behalf of the organizers and the organizers and sponsors of the 5<sup>th</sup> International Clinical Engineering & Health Technology Management Congress ([ICEHTMC](#)), it is our honor to offer this publication that contains all of the abstracts accepted for the oral and poster sessions in this Congress. The strict peer review process of the submissions received that was accomplished through the amazing support received from the Scientific Program Committee members and Global Clinical Engineering Journal team, that together have over 100 experienced reviewers from all over the world, resulted in these Proceedings. This made the 5<sup>th</sup> ICEHTMC Congress an amazing scientific as well as professional networking event. This program exceeds all previous Congress records for quality and quantity.

Major recognition must be given to the unique cooperation between the Global Clinical Engineering Alliance ([GCEA](#)), the IFMBE Clinical Engineering Division ([IFMBE CED](#)), [AAMI](#), and the local hosts [AMTZ](#).

This is the 3<sup>rd</sup> time that the Congress's proceedings are published and available in an on-line format ([GlobalCE.org](#)). The Global Clinical Engineering Journal's commitment to the promotion and sharing of knowledge is evident through its selected editors community of experts and obligation to timely publication of subjects at the cross between engineering, technology, and patient care outcomes. These proceedings are a great accomplishment that will serve the ongoing and growing Global Clinical Engineering field into the future.

Conducting a hybrid style international Congress presents a different stage and greater opportunity to engage with more members within our field as well as with other healthcare stakeholders interested in professional development, scientific debate, networking, collaboration, strengthening friendships, and learning more about best practices from faraway places. We thank all the participants, exhibitors, local hosts, and are confident that you will find these proceedings useful. We wish you success and hope to meet you at our next Congress.

*Together we can make it better!*

Yadin David

Editor-in-Chief of GlobalCE Journal  
and GCEA President
